

**Rafal Sikorki, Patent Law Injunctions, Kluwer Law International, November 2018**

Recognizing that patent disputes have become truly global disputes, this book looks at injunctive relief in major patent jurisdictions around the world. The journey starts with a chapter on the United States, which is followed by chapters on EU law and selected jurisdictions of EU Member States: Germany, the United Kingdom, France, the Netherlands and Poland. Professor Rafal Sikorski emphasises in it's the chapter on patent injunctions in EU law that the Trade Secrets Directive might be of help in determining what factors should be taken into account when deciding on the proportionality of injunctions. He is of the opinion that the majority of these factors could also be applied in the context of granting or denying injunctions in patent infringement cases.
